

Didn't anyone ever read 1984? This movie is obviously not based on fact. The same people who call John McCain a traitor will do the same smear job on Kerry. I shudder to think that a corporation is allowed to abuse it's inherent power over public opinion. I urge the FCC to make a stand not with their respective parties but with the interest of their fellow citizens who oft are swayed by misrepresentations and deceit, in case you were wondering I mean propaganda.

Thank You,

Corey Shemtov
